

“At Malmö Sfi-skola studies are completely personalized. The great flexibility helps you reach your goals. The students that choose Swedish for Entrepreneurs – are not only taught a second language – in classes we integrate relevant subjects for new entrepreneurs. It could vary from how to best market your business to practical questions concerning taxes and returns.”

SANDRA MAGNUSSON, TEACHER IN SFI,
SWEDISH FOR ENTREPRENEURS.

Malmö Sfi-skola

Principal and responsible for Malmö Sfi-skola is Eslövs folkhögskola in collaboration with Folkuniversitetet. Together with competent, highly educated teachers Eslövs folkhögskola runs Sfi classes in Folkuniversitetet's facilities in Malmö. The internet based platform is provided by Folkuniversitetet.

Malmö Sfi-skola – In the middle of the city

We are located in parts of the west harbor at Propellergatan 1. You will easily get here by bus number 2 or 3 that departs from Malmö's Central station.

Malmö Sfi-skola – intensive courses and vocational oriented Swedish

Register today. Speak Swedish in 6 months!

All Sfi studies are free of charge and you have the right
to decide which school you wish to attend.

Welcome to Malmö Sfi-skola!

Language is the key! With good skills in Swedish you will easier integrate to the Swedish community, to continuous studies or employment. Malmö Sfi-skola's outsourcer, Eslövs folkhögskola, have more than a hundred years of experience in adult education and a width from primary level, secondary level to post-secondary vocational training. In collaboration with Folkuniversitetet's highly educated teachers we are aware of what it takes to create an inspiring learning environment which will lead to fast and good results. The schools digital profile and our internet based teaching platform, Moodle, plays a key role.

Intensive studies at a fast pace

All our teaching starts with one person: you! With us you study full-time at a fast pace, which means you are at school 25 studying hours a week. Together with your teacher you will create your own, personal development plan, which averages 6 months from start to finish.

Combine your Swedish studies with a vocational orientation

In addition to the regular Sfi studies we offer vocational oriented Sfi. In the course "Swedish for Entrepreneurs" your Swedish studies are combined with courses in Swedish social- and business studies and entrepreneur courses.

Individual studies

You start out on the study level that fits you the best, and as you progress, you continue to the next level. You and your teacher decide together when it is time for you to advance to the next level.

Selectable support lessons

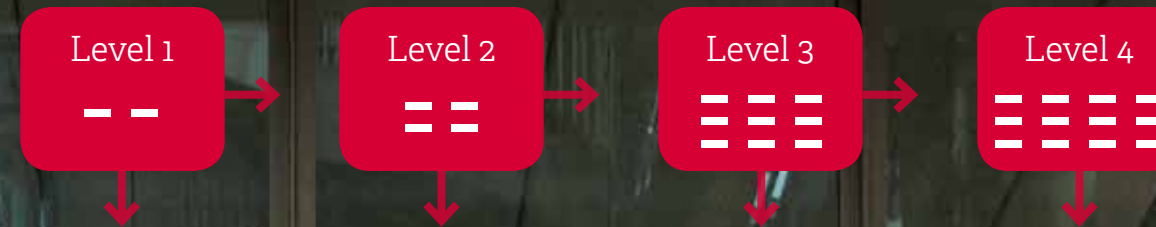

Pronunciation, grammar or writing training? Once a week, in addition to your basic course, you choose extra courses and/or subjects you feel that you need additional training in. At these support lessons students from all different levels interact and work together.

All teaching is in Swedish, of course!

At Malmö Sfi-skola we speak Swedish from day one. This means that you get to exercise your language skills throughout the whole day, which will give you faster and better results.

AFTERNOON:

Highly educated, dedicated teachers

All our teachers are highly educated and their subject knowledge make the classes interesting and varied. Many of them have experienced moving to another country later in life and therefore have an understanding of what it means to start over as well as an awareness of what questions might arise.

Our classrooms are not limited to four walls

At Malmö Sfi-skola teaching is not restricted to the classroom only. We regularly invite external lecturers and often make study visits in places that could be of interest to you, for example The City Library, Malmö Art Museum, Skånes dance theater, The Mine association and the Tax Agency.

Learn more on our digital teaching platform

Moodle is Malmö Sfi-skola's internet based teaching platform. Here you will find weekly schedules, home assignments and messages and passes from your teacher. In addition, you will find many good exercises that will let you practice everything from grammar to pronunciation.
