INSUP BORDEAUX HOSTS A TRAINERS' TRAINING SESSION OF THE COOL PROJECT

From 17 to 20 October 2022, INSUP FORMATION, the French partner of the COOL project hosted a training session on "Design Based Collaborative Learning" for 18 trainers from the 6 partner countries.

The DBCL approach aims to support the education and training of disadvantaged groups in order to stimulate their creativity and empower them as social innovators, in response to the challenges of contemporary society.
DBCL values collaboration and the use of digital creation and communication tools.
The design process involves 5 phases which were introduced by Pr. Tim Scholze, the course facilitator:
- Empathy, to understand and identify the needs of the target group
- Identification of the challenges or problems to be addressed,
- Design of the idea, communication, training or tools to be shared
- Design of the prototype or shared tool
 - Testing.

Divided into 3 teams, the trainers worked on 3 projects and designed prototypes and tools that will be displayed in an exhibition mixing real and virtual objects.

Identification of challenges to be tackled
