The Critical Balance e-book has been finalised

Being critical about something does NOT make you a Critical Thinker! This seems like an obvious statement, but surprisingly many people think that if they are critical towards something, it is just because they "know better".

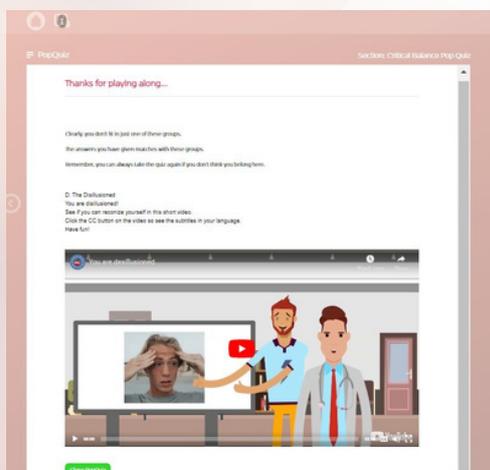

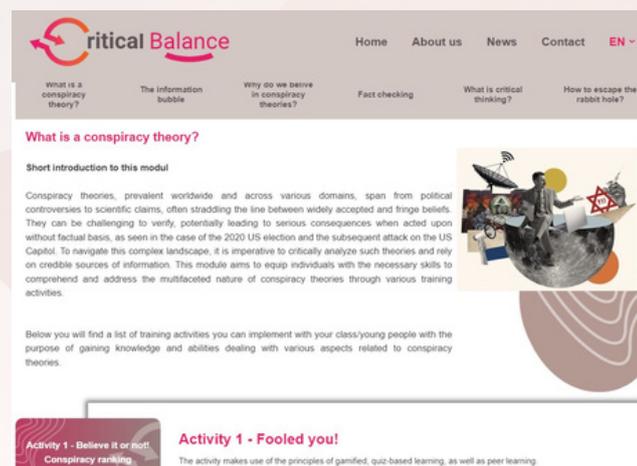

But critical thinking is much more than that.

In this E-book partners try to shed a light on the different aspects of why young people end up believing in conspiracy theories, and how to help them to get a more balanced view and teach them how to be more critical about what they read and hear.

The **Critical Balance e-book** covers the question of what conspiracy theories are, why people believe in them and what you can do to check the facts, and finally even find a way out of the "rabbit hole".

E-platform launched

A slick educational platform that combines the project developments (Conspiracy map, E-book and Toolkit) along with a magazine-style Pop Quiz using the results to target tailored video responses is being finalised within these months. Pay us a [visit](#) and try it out!

The Critical Balance Pop Quiz

The **Critical Balance pop quiz** aims to help you find out if you are a full blown conspiracy theorist, a mainstream sheep, a debunking science nerd or if you have just turned your back on whole mess. Are you a critical thinker, or you are just being critical? Click the above link and Find the answer!

Training event to take place in Latvia

In Latvia, in January 2024 a training event will be organised for youth workers. We'll keep you posted about the experience!

Stay tuned for more, visit our [website](#) and [FB page](#).
