The Online Creative Hive: Learning and Networking

Networking is crucial for unemployed and young people seeking career opportunities and skill development, especially in light of the pandemic. The creative sector relies heavily on networking for corporate survival. The goal is to use networking as a constant tool for the business to exchange ideas, cooperate, learn from others, and support and enhance its network at all levels, rather than simply during critical periods.

Co-funded by
the European Union

This project has been funded with support from the European Commission. This communication reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

In this context, the partnership created an open online e-learning and networking platform with two functions:

1. the platform provides users with learning resources while
2. it serves as a forum and networking space for participants to make the most of collaborations and stay in touch with a comprehensive network to grow.

We are organising a **workshop for the Creative Hive** in Tenerife in September 2024 where experts will discuss about development, functionalities, and the next steps before its launch!
