

Press Release 1: Launch of PreventMI RoadmApp and Toolkit

Empowering Youth Work Through Innovation and Inclusion

Folkuniversitetet is proud to announce the upcoming launch of the PreventMI RoadmApp and Toolkit—two innovative tools developed within the Erasmus+ PreventMI project, aimed at supporting youth workers in preventing radicalisation among marginalised young migrants.

The RoadmApp is a gamified, interactive tool that helps young people reflect on their goals, values, and emotional development, while the Toolkit provides youth workers with practical exercises and techniques grounded in Emotional Intelligence and Transformative Learning.

Designed for ease of use and real-life impact, these tools will soon be available for educators, social workers, and organisations working with vulnerable youth. Stay tuned for the official release and training opportunities!
