

## **Press Release 2: PreventMI Tools Successfully Piloted in Sweden**

### *Youth Workers and Migrants Test Innovative Tools for Inclusion*

Folkuniversitetet has successfully completed the **pilot phase** of the **PreventMI RoadmApp and Toolkit** in Uppsala. As part of the Erasmus+ PreventMI project, the tools were tested with youth workers, adult educators, and migrants during interactive workshops held on site.

Participants praised the tools for their **simplicity, relevance, and real-life applicability**. The RoadmApp supported young people in setting personal goals and reflecting on their emotional development, while the Toolkit provided educators with structured, easy-to-use methods to foster inclusion and resilience.

The piloting confirmed that these resources fill a critical gap in youth support and education, especially in multicultural settings.
